WEBINAR ON DISPELLING THE MYTHS ABOUT ROOFTOP SOLAR

4.00 PM - 5.30 PM

Speakers

Overview About Rooftop Solar

Mr. S. Venkatachalam
Managing Director, Orient Green Power Co. Ltd. &
Chairman, Expert Committee on Energy, MCCI

Address on Current Rooftop Solar Policy and options available for LT & HT consumers

Mr. S. Sankara Narayanan
General Manager
Tamil Nadu Energy Development Agency (TEDA)

Case Studies – Financial viability of Rooftop Solar for C&I consumers

Mr. Hari Subbish Kumar Subramanian
Auroville Consulting

Suprabha Scheme – Credit lines for Rooftop solar

Ms. Sadhana Mankad
Deputy General Manager, SBI

Q&A Session

Solar power currently makes up just 4% of the nation's power supply but is a fast-developing industry. It is expected to grow 18-fold and become the new "king of India's generation fleet" by at least 2040. Would this prediction come true?

Tamil Nadu has already emerged as a leader in renewable energy through its highest wind power capacity among all States. It has the potential to become the highest installed rooftop solar energy generation capacity in India with a vision to install 9000 MW by 2023.

Rooftop solar systems are becoming a popular source of electric power because it is a renewable energy source and it is abundantly available during the day. However, the following doubts/concerns linger in our minds....

- Solar panels are expensive.
- Return on Investment (ROI) is not immediate.
- It is not eco-friendly.
- It does not work when cloudy.

Are they Myths?
